# Kiba's FPL Treats

## Credits & Use

A short note on where this project draws from, who deserves credit, and how the work on the site is meant to be shared.

**At heart:** Kiba's FPL Treats is a small independent project built inside a much bigger community. It only exists because the wider FPL space is full of people who share ideas, numbers, observations, and enthusiasm for the game.

## Credits

- Credit goes to the FPL community at large - for the conversations, resources, and collective curiosity that make projects like this possible.
- Elevenify data is used within the broader workflow behind this project.
- Special credit to members of **@fplpack** on Instagram - for being great, and for contributing to the kind of atmosphere that keeps this corner of FPL thoughtful and enjoyable.

## Use

Kiba's FPL Treats is made to be read, shared, discussed, and enjoyed in good faith.

If you reference a visual, table, or piece of analysis from the site, a clear credit to Kiba's FPL Treats is appreciated. Please do not repost full graphics, full tables, or written work as your own.

Public stats, community ideas, and third-party data remain the responsibility of their original sources. The value of this project lies in how that information is interpreted, combined, and presented.

## A note

This is an independent project made with genuine care for the game and respect for the people who make the FPL space interesting. The aim is to contribute something useful, not to overclaim ownership of a community-driven ecosystem.
